PROFESSIONAL EXPERIENCE

Tinkoff
Middle Java Developer

Saint Petersburg, Russia
02/2024 - Present

- Developed game mechanics for investment tournaments within Tinkoff Investments. Seasonal tournaments attracted up to 120,000 participants.
- Developed and implemented a mechanism for automatically creating partitions in PostgreSQL, thereby relieving the department's teams of routine work and providing them with a flexible mechanism.
- Designed and implemented a mechanism for validating and merging JSON structures for flexible configuration of tournament instances, making each instance flexible to configure.
- Added SSO authorization for our backend services via a special sidecar service.
- Acted as a mentor for interns: helped them understand the project, conducted code reviews for them, and helped them figure out how to implement tasks. All interns were promoted to junior positions on the staff after certification.
- Participated in code reviews during the development phase, as well as in code reviews during the business logic testing phase.
- Participated in hiring interns for our team
- I was a teacher at the Tinkoff Backend Academy, checking students' homework and scheduling conference calls to discuss their questions about the project.
